

### **Swiss Shield Arbor FR**

Flame resistant, microwave Shielding fabrics for the use in public spaces.

Wherever curtains are used in public spaces, certain demands on their resistance to ignite must be guaranteed. Our new shielding curtains Arbor FR are certified to be used in public places such as wellness hotels, recreation rooms, kindergartens, restaurants, offices etc.

Arbor FR has been tested by the EMPA (Swiss Federal Laboratories for Materials Science and Technology) and classified as highly flame resistant and low on fumes emission, fulfilling fire protection requirements in public spaces.

For more info's and technical specification, please refer to:
